monitors apps

Service Center

Administration console, accessible via a browser, that provides access to the platform server configuration for administration & operations teams

The screenshot displays the OutSystems Platform Administration Console. The top navigation bar includes 'outsystems platform', 'Factory', 'Monitoring' (selected), 'Administration', and 'Analytics'. A search bar and 'Administrator - Logout' link are on the right. Below the navigation bar, a breadcrumb trail shows 'P10 Server' and a list of menu items: 'Errors', 'General', 'Web Requests', 'Mobile Requests', 'Integrations', 'Extensions', 'Timers', 'SMS', 'Emails', 'Processes', 'Mobile Apps', 'Environment Health', and 'Security'.

The main content area is titled 'Environment Health' with a 'Refresh Data' link. It includes a description: 'Displays the current status of the platform server separated by Front-end Servers, SMS Gateway, and Timers activity. A green ...'. Below this is the 'Front-end Servers' section, which displays a table of server status.

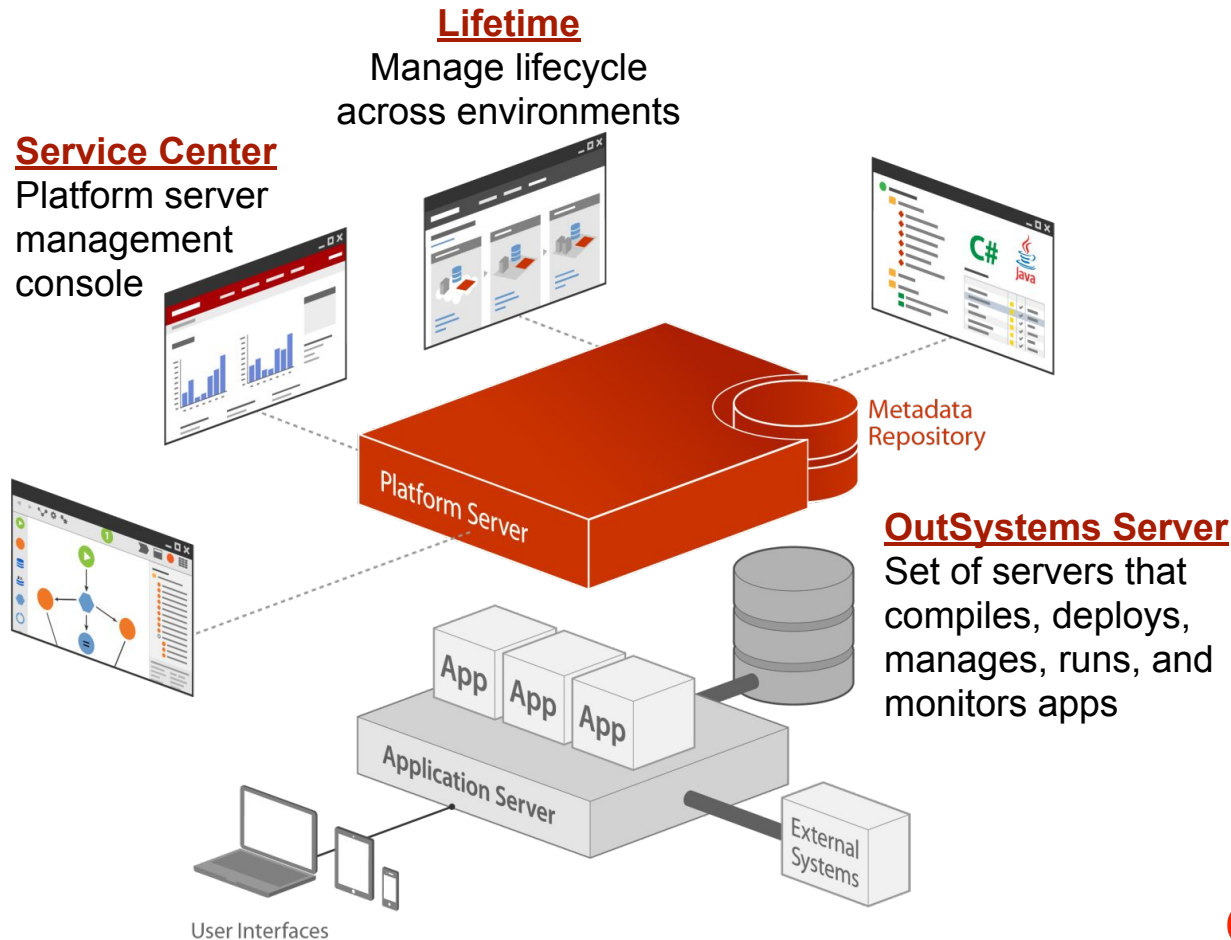

Front-end Server	IP Address	Deploy. Controller	SMS Connector	Scheduler	Log	Deployment	IIS	Mobile Apps Service
enp100ndvacd1 (Controller)	127.0.0.1	✓ detail	✓ detail	✓ detail	✓ detail	✓ detail	✓	✓ detail

Below the table are sections for 'Processes' and 'Timers'. The 'Processes' section shows counts for active, queued, and suspended instances, as well as events with errors. The 'Timers' section lists timers to be executed next, ordered by their next run time.

Espace	Tenant	Timer	Last Run (duration)	Next Run	Running since (duration)	Running By
PerformanceMonitor		GroupRawData	2016-09-23 17:30:02 (0s)	2016-09-23 17:45:00		
(System)		ErrorLogMonitor	2016-09-23 17:30:03 (0s)	2016-09-23 17:45:00		
(System)		CleanAndroidDownloads	2016-09-23 17:30:04 (0s)	2016-09-23 17:45:00		

On the right side of the console, there is a sidebar with 'Manage all environments', a 'P10 Server' summary card showing 'Unlimited Edition' and 'Development mode', and a 'Recent items' list.

LifeTime

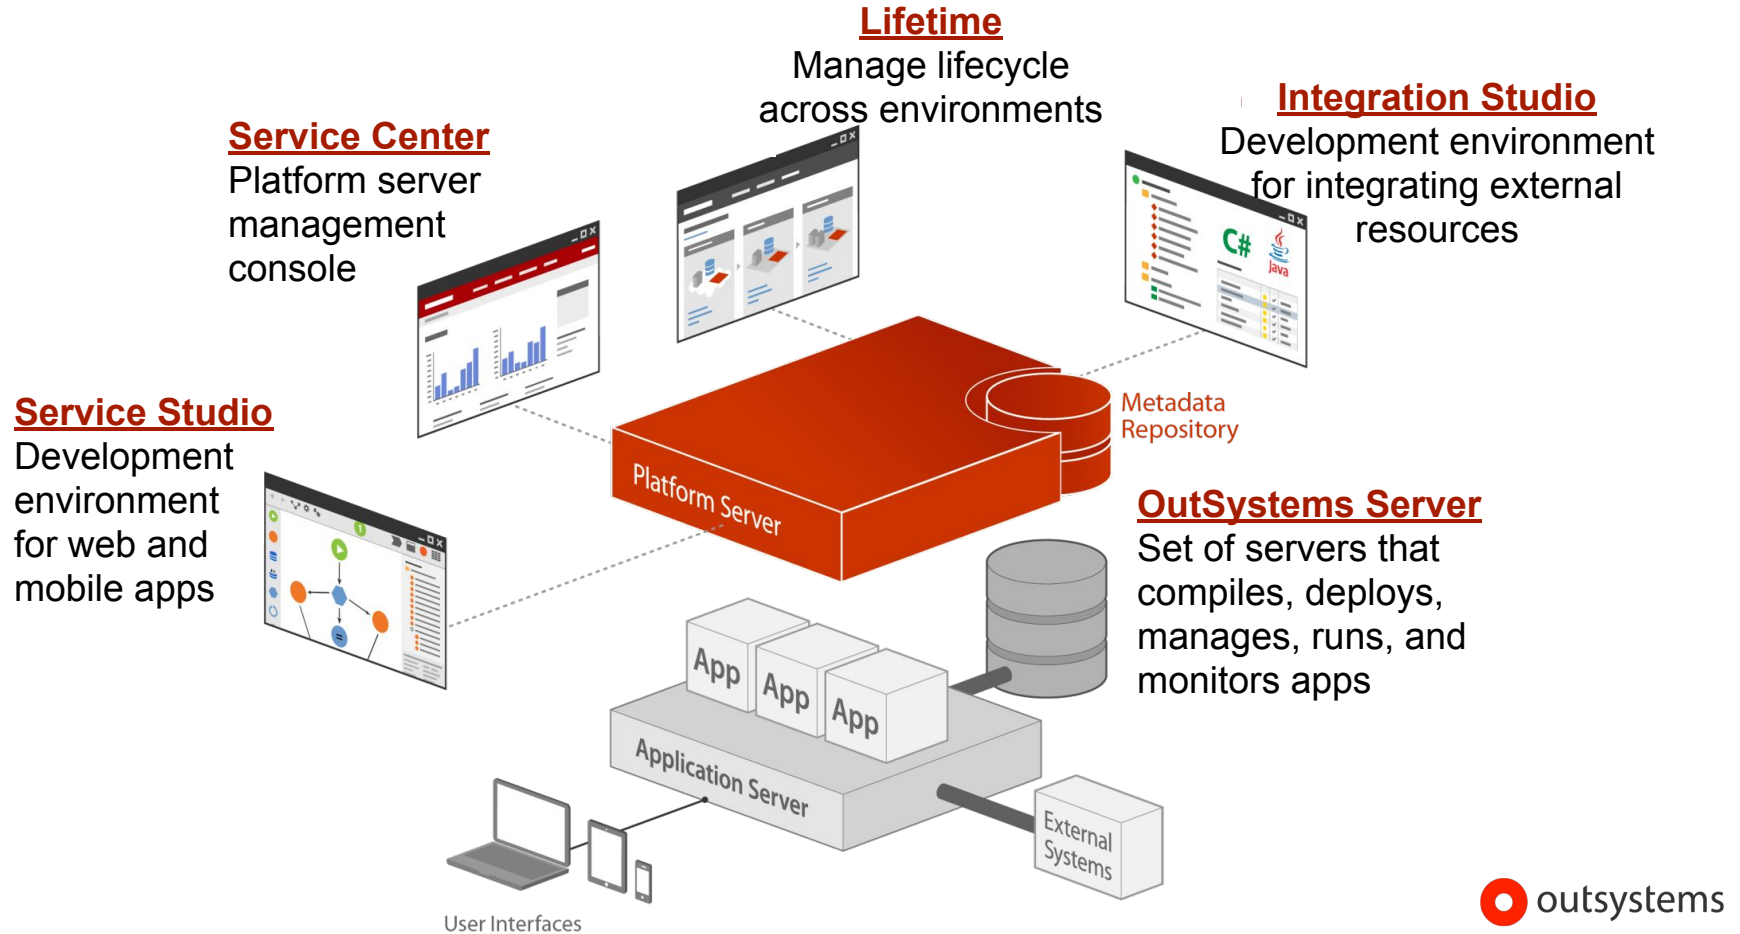

LifeTime

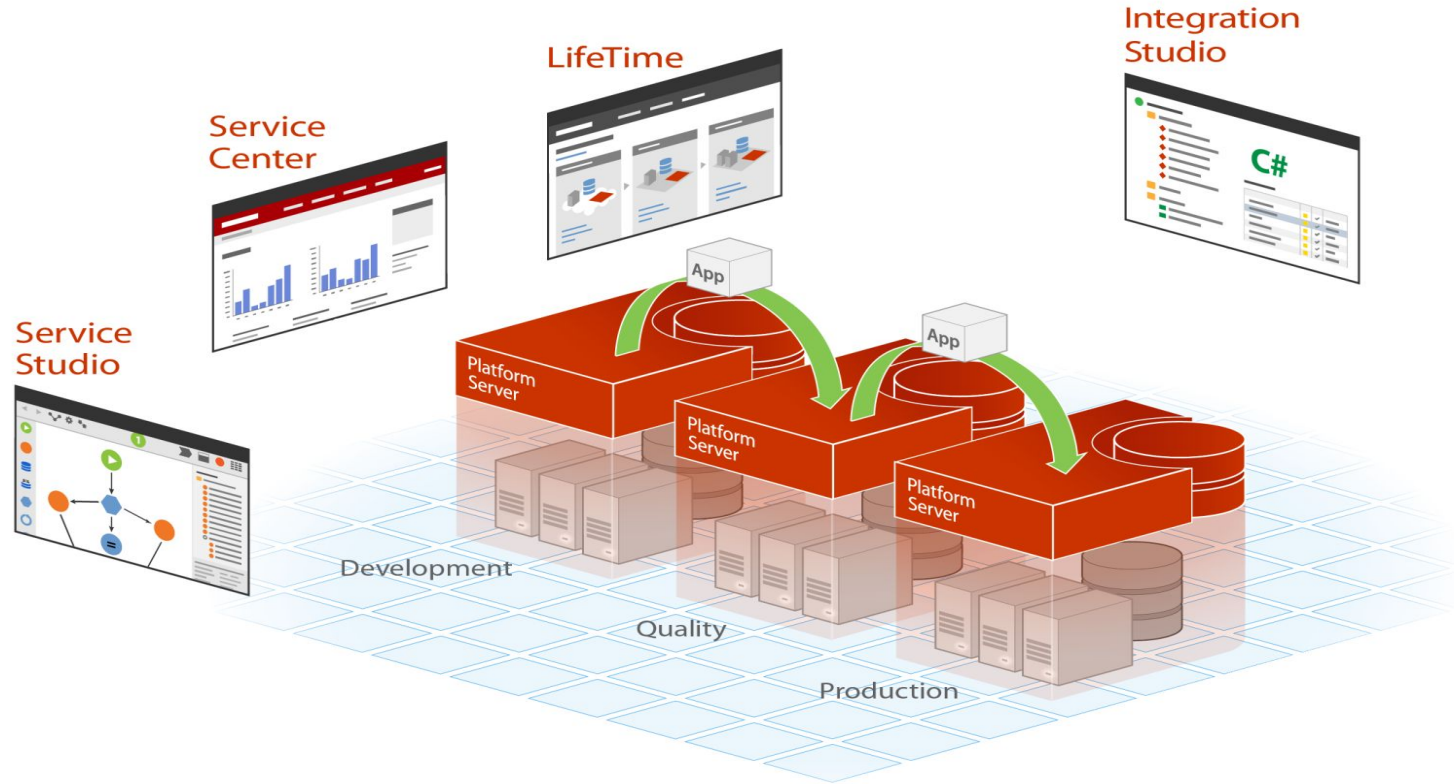

A web app that extends Service Center's capabilities to cross environment scenarios.
Provides complete application lifecycle management via a browser.
